ABOUT ME

Experienced frontend developer building modern, maintainable interfaces, focused on creating efficient, user-centric applications. I primarily work with React, TypeScript, and Tailwind CSS, utilizing state management tools like Zustand. I am known for my hands-on approach, teamwork, and commitment to continuous improvement, delivering clear and scalable solutions in agile environments.

EDUCATION

Instituto Técnico Superior Comunitario
Associate Degree in Software Development
2020 - 2023

TECHNICAL SKILLS

- React
- TypeScript
- JavaScript
- Zustand
- TailwindCSS
- Bootstrap
- Node.js
- Express.js
- PostgreSQL

LANGUAGES

- Spanish (Native)
- English (Intermediate)

SOFT SKILLS

- Teamwork
- Effective communication
- Continuous learning
- Problem-solving
- Analytical thinking
- Responsibility and commitment
- Proactivity
- Time management
- Attention to detail

PROFESSIONAL EXPERIENCE

Frontend Developer

Signos Framework SRL | July 2025 - Present

- Development of modern web interfaces using React and TypeScript, focused on usability, performance, and maintainability.
- Implementation of scalable style systems with Tailwind CSS and reusable components aligned with product design.
- Management of global and local state with Zustand, improving data flow organization and user experience.
- Integration and consumption of REST APIs, collaborating with the backend to ensure efficient communication between the frontend and server.
- Ongoing collaboration with multidisciplinary teams using agile methodologies, contributing ideas, resolving issues, and improving development processes.

CERTIFICATIONS AND COURSES

ITLA

- **UX/UI Design Course (User Experience / User Interface).**
- **Frontend Web Development Course with Angular.**
- **Database Administration 1.**

Frontend Masters

- **Complete Intro to React, v9.**
- **Introduction to Node.js, v3.**

EF SET

- **EF SET English Certificate 67/100 (C1 Advance).**

PROJECTS

Cash Request

- Participation in the development of the system's frontend, using React and TypeScript to build modern, typed interfaces.
- Implementation of state management and data synchronization with Zustand and TanStack Query, ensuring consistency and efficiency in communication with the backend.
- Development of a responsive and maintainable UI with Tailwind CSS, aligned with the product's functional requirements.
- Integration of the frontend with backend services during the system migration process, collaborating closely with the technical team.
- Development of new functionalities and adjustments to existing features, prioritizing stability and user experience.

Exercise Tracker - Demo - Code

- Development of a full-stack MERN application for training tracking.
- Implementation of CRUD functionalities for exercise management (create, edit, delete, and view).
- Construction of interfaces with React, focused on usability and responsive design.
- State management using the Context API.
- Integration with a Node.js and Express.js backend.
- Data persistence in MongoDB using Mongoose.
- Adaptation of the application for mobile and desktop devices.
